

Pluck's Land Rollers

ROLLER TRANSPORTER

Road Transport Bogie for Heavy Land-Rollers

Our roller transporter is covered by Patent Pending

- Efficient land-roller transport between farms
- Quick and easy to load and off-load
- Significant savings on land-roller wear and tear
- Expertly designed and built to last

Easy and efficient heavy land-roller transport system

Pluck's land-roller transporter is designed and manufactured to the highest quality standards to give years of reliable service, and is backed by Manufacturer's Warranty

Efficient Land-roller transport between farms;

An easy and economical way to transport your heavy land-roller between farms;

Simply reverse the empty land-roller up on to the bogie, secure with strops, connect hydraulic hoses and raise the bogie, then tow on to the next farm. All the time your tractor and roller remain connected whilst using the roller drawbar to tow.

And off-loading is just as simple!

The Pluck's land-roller transporter saves you time and hassle and stops the wear and tear associated with rolling your roller between farms.

Features of our Land-Roller Transporter;

- Robust quality steel chassis with integral loading ramp
- Heavy-duty stub-axles and hubs with 14-ply pneumatic tyres
- Hydraulic rams for raising and lowering the bogie during loading
- Ample chassis side clearances for easy loading
- Integral aiming guides for accurate roller alignment
- Rear bumper rails ensure safe roller placement during loading
- Compact design to keep transport width down
- Quality industrial enamel paint finish
- Professionally designed and rated for towing speeds up to 30 km/h*

Benefits of the Pluck's design;

- Designed and built by us - an expert land-roller manufacturer for over 50 years
- Suitable for most makes and sizes of land-rollers – no need to modify your roller!
- Very easy to reverse the roller on and drive off with ample clearance and guides
- Simple raising and lowering using tractor hydraulics
- Military grade wheels can handle the toughest road conditions
- Minimal maintenance – no greasing required!
- Expertly fabricated and welded to the highest standards (AS/NZS 2980)
- Strong, tough and built to last

*Pluck's land-roller transporter is rated for safe towing up to 30km/h with a total towing weight up to 8,000 kg (mass of transporter including land roller). Land-roller must be emptied of water before loading.

Customised transporter options are also available
